Special Collections of Gladiolus

Unusual Varieties That Will Add a Wealth of Beauty and Color to Your Garden.
They are Top-Notchers and Please Thousands of Our Year-In and Year-Out Customers.

Pastel Special Many people prefer the pastel shades, and this assortment will include light pinks, whites, light lavenders and yellows. It will include no miniature varieties, only large size varieties and some that are quite new. The real value, if figured each variety separately, would probably be not less than \$12.00 per 100.

Bulbs 1 1/4 in. up, not labeled: 50 for \$4.00; 100 for \$7.50, postpaid

Dark Special Much the same as the above except all in the dark shades: red, scarlets, black-reds, deep pinks and salmons, deep rose, purples, violets and blues. Both assortments are real values.

Bulbs 1 1/4 in. up, not labeled: 50 for \$4.00; 100 for \$7.50, postpaid

Miniature Special Last season, we had to discontinue this assortment as the demand proved to be so heavy that we sold out long before the end of the season. I think we now have sufficient stock again to offer about 20 varieties in medium size bulbs only. This should be an exceptional value for the garden club people, who like these little fellows for arrangements.

100 Large bulbs for \$4.90; 100 Medium bulbs for \$3.65, postpaid

Dahlia Collections

1 Tuber Each of 10
varieties of Dahlias including
Pompon, Decorative and Cactus
types in various colors for
\$2.95, postpaid

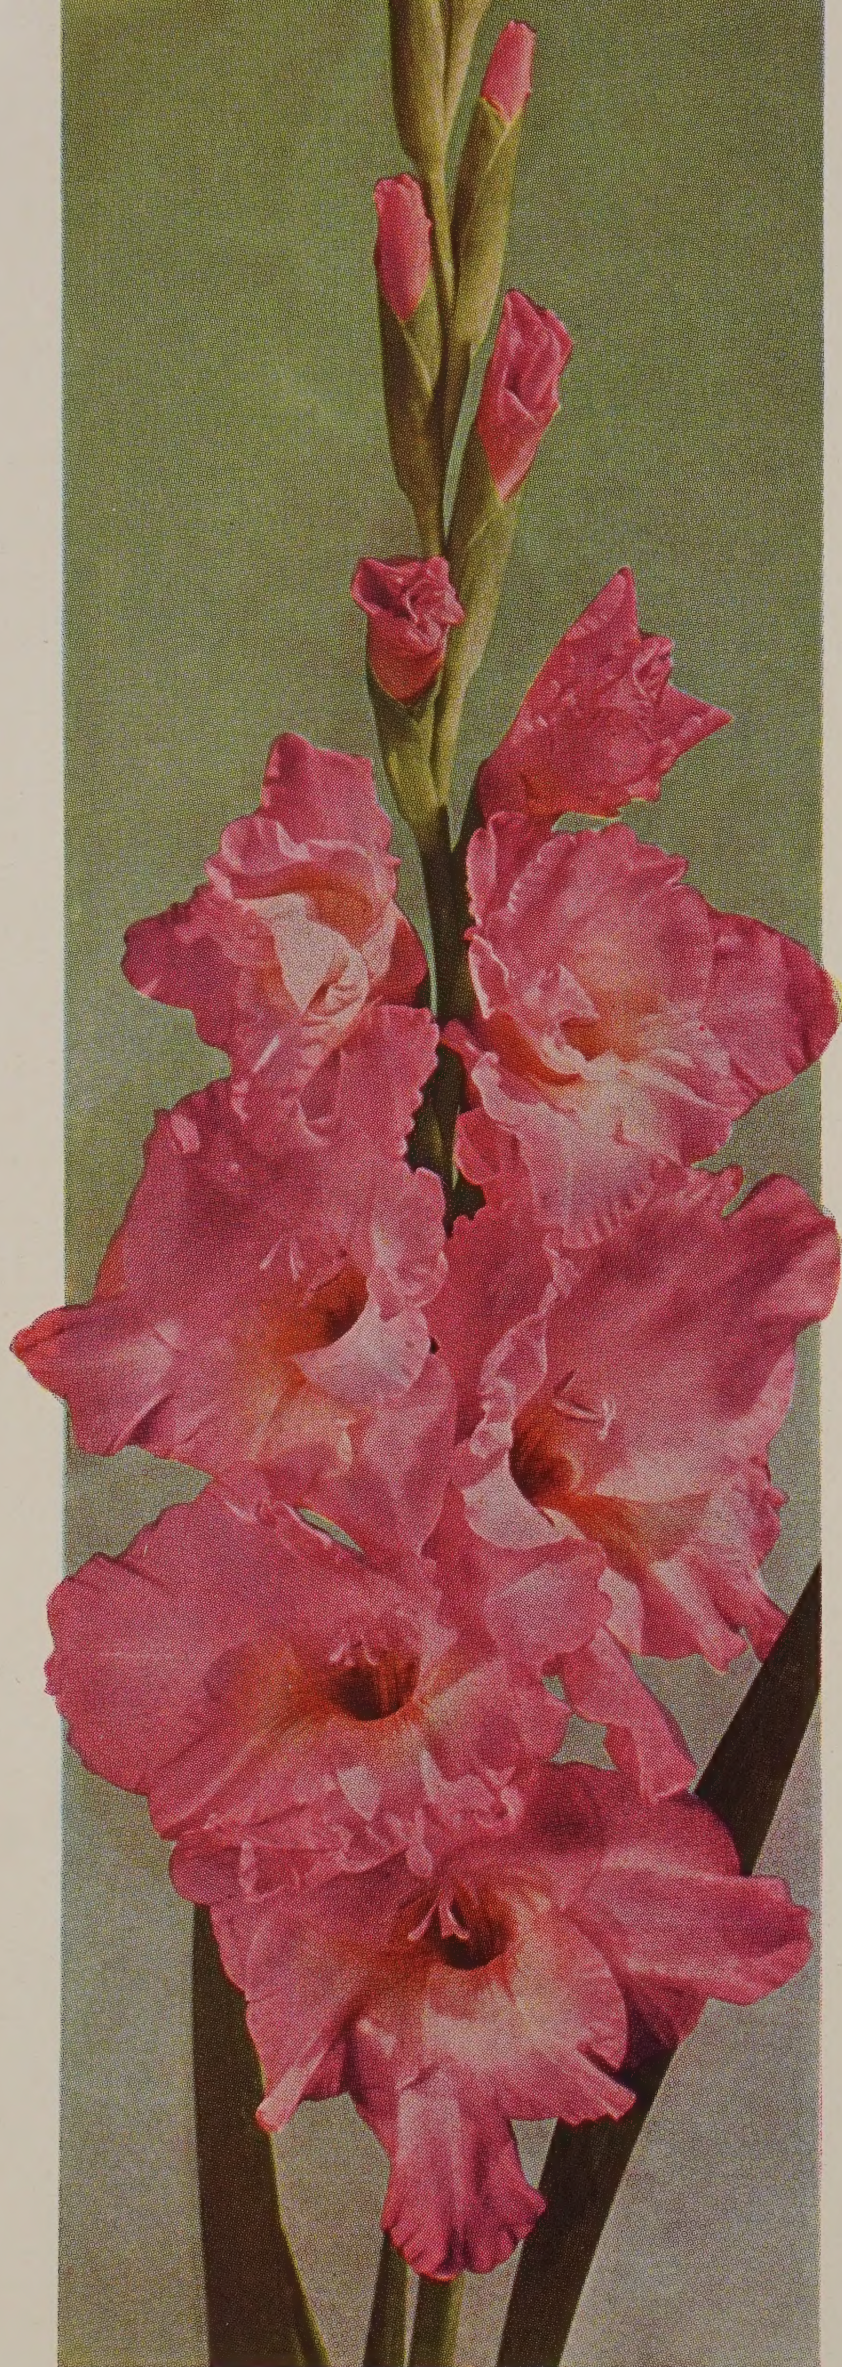

1 Tuber Each of 10
varieties in a well balanced color
assortment of Pompon and
Miniature Dahlias for
\$2.75, postpaid

D.—Same as above except in medium size bulbs for **\$5.50, postpaid.**

The "Glad" Boys at Moses

Left to right: Joe Hendrickson, Bill Hendrickson, field and warehouse foreman; John Hendrickson, Tom Flood, Willard Pullman, who oversees all retail shipping; William Francis and Jene Smith, both tractor operators.

We as a whole group wish to extend our sincere thanks for every order, large or small, that has been placed with us. From the reports we have, I am sure our bulbs are most satisfactory. However, if there was anything wrong, let us know. We cannot correct an error if we do not know about it.

Cordially,

Alfred L. Moses "Glad Growers"

"Yours truly" checking on one of Carl Fisher's new seedlings.

as We See It!

As we start work on this catalog we are watching carefully our two acre **Show and Test Gardens**. In all, there are between 400 to 500 varieties, including seedlings not yet named from many parts of the United States and Canada; new varieties just introduced from all parts of the world, others that are contenders for the places that Picardy, Corona, Maid of Orleans and others still hold, as well as many of the old standbys.

Improvement in Miniature Classes

Of the thousands of varieties already on the market, we are still noting seedlings in new colors and forms, some of immense size and others that are real improvements in the miniature and 200 class. It seems there is no end to the advances in this glorious flower.

Competition Keen

But competition in the hybridizing field is becoming more and more keen. Thousands of seedlings are being rushed to the show tables and the judges are getting tougher and tougher. Even at that all too many seedlings are being named and offered for sale, with the result that the growers and fanciers are simply being taken in when they put good money into such trash.

Patronize Trial Gardens

We are making it our business to test out varieties for one to three years prior to our listing it, any brand new variety. I believe that hybridizers should patronize the trial gardens more fully, and if they are really sold on a favorite seedling, should be willing to place trial bulbs in the hands of growers whom they have confidence in. After all, it is the grower who really invests sizeable amounts in new varieties—it is seldom less than \$100.00 and often up into the thousands. We are simply urging that favorite seedlings be given more widely diversified trials in climates, soils and growing methods.

Best of All Around Commercials

We are asked many times to suggest a good list of varieties for commercial growing. The following varieties vary greatly in price, but I have tried to name enough in each color class so you can pick out some to suit your own pocketbook. Varieties marked (*) ship well when cut in tight bud. There may be others, but as yet we have not had a chance to check them.

White: *Leading Lady, Anna Mae, *Snow Princess, *Snow Flurry, *Heavenly White, *Surfside.

White With Marking: *Margaret Beaton, Silentium.

Cream and Buff: Lady Jane, *Intermezzo, Sunspot, Donna.

Cream and Pink: *Corona.

Salmon-Pink: *Picardy, Pink Charm, Nadia, *King William.

Light Pink: Ethel Cave-Cove, *Beauty's Blush.

Pink and Rose-Pink: *Pink Radiance, Pink Paragon, Big Top, Tivoli, Magnolia, Salutation.

Rose: Gwen, Chamouny, Rose Glow, *Rosa Van Lima.

Lavender: *Elizabeth the Queen, Wedgewood, *Lavender Prince, Peggy, Lavender Queen.

Purple: Purple Supreme, Lancaster.

Blue: *Abu Hassan, Blue Beauty, Ravel.

Yellow: *Spotlight, *Mother Kadel.

Orange: Trocadero, October Sunshine, Orange Gold.

Scarlet: *Valeria, Ohio Non Pariel, Dieppe.

Medium Red: Red Charm, Stoplight.

Dark Red: Black Opal, Midnight Red, Mohawk, Birch Red.

Gladiolus of Merit as We See It!

EARLY VARIETIES

Not all first earlies are first class Glads, but oftentimes bring big money before the main crop comes in. Some of these varieties are not listed in this catalog but we do grow some stock and can quote in reasonable quantities.

Anna Mae	Pink Charm
Blue Beauty	Red Penny
Carillon	Rosa Van Lima
Early Gold	Snow Princess
Ethel Cave-Cole	Valeria
Gold Dust	White Butterfly
Heavenly White	White Gold
Midnight Red	Yellow Herald
Mt. Index	

October Sunshine

Early Cut-Blooms Mean Money

Season's Notes and Comparisons of Selected Varieties for Gladiolus Enthusiasts

Our Show and Test Garden has attracted many hundreds of Glad fans, hybridists and commercial growers this past season. With the several hundred varieties, some still seedlings, and some brand new varieties planted with the best of the older varieties, we have had a fine chance to compare, select and discard. We have had some wonderful seedlings from noted hybridists. These included several yellows from one source we are sure you will hear more about later.

Gwen, Gail

We are introducing two seedlings from our trial plot that we have tested for two to three years. These are GWEN, a fragrant rose that really has been good, and GAIL, a lavender that will make a very fine commercial as well as hold its own on any show table.

Leading Lady, Snow Flurry, Alpine, Beauty's Blush, Connecticut Yankee, Lipstick

I do not think we have tried anything new that is better than LEADING LADY and SNOW FLURRY. I still can't discard little ALPINE, 300 class, short, but Oh so beautiful. Did you ever hear of a bedding Glad? I haven't, but it should be ideal, planted as you would Tulips. BEAUTY'S BLUSH was really fine this year. Those long, stretchy spikes were impressive. CONNECTICUT YANKEE and LIPSTICK are old standbys now. Connecticut Yankee is the show flower, and Lipstick the good commercial.

Marion Pearl, Truelove, Treasure Island, Bengasi, Phantom Beauty, Little Sweetheart

MARION PEARL was just as good as ever. TRUELOVE, rather early in a fine clear color has competition in TREASURE ISLAND, which is one of LINS' best. We had the best BENGASI we ever grew but it still is not good enough. PHANTOM BEAUTY can't take the heat, as it burns badly although it makes good spikes. LITTLE SWEETHEART, another 300 size showed up very well.

Fabulous, Capsicum, Mystery, Tivoli, Pink Paragon

FABULOUS was the best ever but will get blue with a quick change of weather. CAPSICUM with its pleasing throat marking still comes up to expectations. MYSTERY is still a mystery, last year real good, this year not so good. TIVOLI, one of the very best of the European varieties, makes massive spikes of very clean and unique florets. We have always liked PINK PARAGON and it will make a fine commercial type cut flower.

Snow Flurry

Season's Notes and Comparisons of Selected Varieties for the Gladiolus Enthusiasts

Topflite, Wedgewood, Lavender Prince, Gail, Peggy, Myrna Fay, Huntress

The color of TOPFLITE can't be surpassed. It's just beautiful, but the spike was short of buds this year. I hope this isn't a lasting fault. If I were to pick the one variety that is most outstanding in the development of the past two years, I would pick WEDGEWOOD. It is only in the 300 class, but it grew to my shoulder in height, and held six open nicely. A beautiful color combination. LAVENDER PRINCE is going to make a good commercial and will open well from tight bud, but it hasn't the fine quality points for good handling. GAIL has all the points needed to handle easily and opens right to the tip. This lavender has what it takes. PEGGY attracts a lot of attention and is good. MYRNA FAY is a good grower and it is one I like to cut but the color is muddy. The only quality I really like about HUNTRESS is its real earliness and we will continue to grow it for that reason.

Birch Red, Revlon, J. V. Konynenburg, Valeria, Journey's End, Dieppe

There wasn't a thing in our planting that would come up to BIRCH RED for growth, consistency, and beautiful color. It may be too dark for large scale cut flower growing but every small grower will have it sooner or later. REVLON makes fine spikes. J. V. KONYNENBURG is real good, but will never take the place of VALERIA as some have reported. We have got to discard JOURNEY'S END. It is a beautiful Glad but we can't get to first base propagating it. DIEPPE steps into its place.

Firebrand, Red Charm, Hiawatha, Burma, Rose Glow, Venida

FIREBRAND can win, but as a flower I prefer RED CHARM. HIAWATHA doesn't come up to my expectations this year. BURMA remains number one as a show rose but it can't stand handling. Both ROSE GLOW and VENIDA look very good.

Ravel, Porcelain Blue, Blue Ice, Abu Hassan

I am putting RAVEL at the top of the blue list. We see many spikes of it with 10 beautifully formed florets open. PORCELAIN BLUE comes second. BLUE ICE was the best we have ever had and the nearest to a true blue, but it has a bad stem. ABU HASSAN is here to stay in the dark blue class.

October Sunshine, Orange Gold, Trocadero, Flicker, Twinkles

OCTOBER SUNSHINE is making a name for itself. Its color carries weight over anything around it. ORANGE GOLD is the nearest to true orange and it is a good variety, also. We like TROCADERO and think it is one of Lins' best. FLICKER is an outstanding 200 class orange, and TWINKLES is a real break in the small class with its intense ruffling and bright, flashy color.

Pactolus, Sparks, Sunspot, Donna, Hugh Price

One of the finest novelties of the year is PACTOLUS, a European buffy yellow with a distinct dark blotch. SPARKS held its last year's reputation as being real good. SUNSPOT is not always good, but will make some real show spikes, while DONNA is still my favorite in the buffs. We had one Australian variety, HUGH PRICE, a buffy cream color with darker lower petals, that was very good.

Mother Kadel, Crinkle Cream, Golden Arrow

I'm still looking for a real good commercial yellow, one larger than MOTHER KADEL, which is our best at present. CRINKLE CREAM is good, but doesn't suit me while GOLDEN ARROW hasn't bloomed yet. There are a lot of yellow seedlings making their appearance, but few good ones are available yet.

As space is limited I will just mention a few that were real good and that we will continue to grow and propagate: BELLE JAUNE, BENJAMIN BRITTON, BETTER TIMES, three from Europe that proved to be good, while SPITFIRE, ATHLONE, FIREBRAND, NILA, RED CHERRY, RED WING, SILVER STAR, SPINDRIFT and VICTORY QUEEN from this side of the water were as fine. I hesitate to start naming the ones that were no good as the list would be too long for the space we have.

3 New 1949 Glad

In Rose, Lavender

These three introductions are offered at a conservative price because we want you to grow them this year.

GWEN (Pickell-Moses-49) 560-80

This new introduction is a fragrant variety that is a shade lighter than Chamouny and a little deeper than Oregon Rose. Placement is nearly 100% perfect and it is consistently grown with tall, stretchy spikes. In three years growing I have never seen a crooked spike. It will open 6-8 beautiful florets that will stand handling and will win on any show table. It cuts 100% usable spikes. As for its fragrance, it is definitely fragrant to better than 50% of those who try it. This is not offered because of its fragrance, but rather because of its color, placement, stretch and handling qualities. It was tested in the Interstate Trial Gardens and passed every test. We have grown it for three years in our own gardens. It has received all the seedling awards Empire State Gladiolus Society can give it, an award from the North American Gladiolus Council, and won ribbons wherever shown in the color classes. In addition to this, it has been tested in just average gardens with excellent results. The price is low, so you can easily afford this one.

Price: \$3.00 large bulbs only, no bulblets.
Limit—3 bulbs to any one customer.
No Discount.

Outstanding Gladiolus

GWEN
A delightful
Rose

Introductions

and Yellow, Flushed Red

GAIL (Farrington-Moses-49) 466-80

After two years of testing this Glad which was originated in the mid-South I am convinced it is as good as anything I have seen. It is a 400 class Glad that consistently makes a tall, stretchy spike with beautiful placement of its 7-9 open florets with gracefully recurving petals. Attachment is the very best, making it easy to handle in quantity. It is light lavender, shading to deeper lavender at the petal edges with a light penciling of rose-cerise on the lower petals deep in the throat. I have never seen a crooked spike or the slightest sign of flaking in any weather condition, and it stands heat excellently. It opens well in water, keeping its size to the tip. After two years I am unable to name even the slightest fault except that it is just an average increaser. Mr. Farrington selected it from hundreds of fine seedlings and says it is tops and I agree with him.

Price: \$3.00 any size bulb.

1 bulb and 10 bulblets for \$6.00.

Bulblets sold only with bulbs.

No Discount.

MARIONETTE

(Butt-Moses-49213-75)

Ruffled miniature in unusual color combination. The outer portion is yellow, flushed red with a large, dark red throat blotch. Plants grow to an average height of 36 inches with graceful, wiry spikes that are always straight. 15-17 buds with 6-7 open, usually well placed and spaced. Florets delightfully ruffled, heavy heat resisting texture, blooms about 3 inches in diameter. This should be valuable for small arrangements such as corsages, low bowls, as well as a bedding plant which will give lots of bloom and requires no staking.

Price:

\$5.00 any size bulb; 12 for \$50.00.

No Bulblets. No Discount.

Destined for Leadership

PLEASE READ CAREFULLY BEFORE ORDERING

ACKNOWLEDGEMENT OF ORDERS: As soon as your order is received it is booked as an original and three copies. The pink copy goes to you as an acknowledgement of your order. The yellow and orange copies go to the warehouse for filling the order. When the order is filled the yellow copy is put in the package as a check list for you. This is not a bill, but a packing sheet. The original stays in the office as a permanent record at all times. In writing regarding your order, PLEASE mention the number. This will save us considerable checking.

ORDERS FOR LESS THAN \$2.00 cost us as much expense in labor and trouble as those over. PLEASE do not send orders for less than \$2.00.

On retail orders of \$3.00 to \$10.00 you may add 5% of the total order in extra bulbs of your choice. Add 10% on orders from \$10.00 up, BUT this does not apply on items taken from the quantity list nor does it apply on those items marked NO DISCOUNT. Do not select "No Discount" bulbs for extras, or figure the discount on "No Discount" purchases. If you have a preference for certain varieties as extras, please specify. It helps. We try to give orders some extras depending on the size of the order.

SHIPMENT: All retail orders are shipped parcel post unless otherwise specified. They are shipped prepaid after March 15th, when parcel post shipments are safer. We can ship earlier but it is at your risk.

WHOLESALE orders are shipped express collect unless otherwise specified, as express is insured against frost. These orders we ship as soon as we can from the warehouse after January 1st, unless customer specifies otherwise. From March 15th to May 1st, however, we are usually rushed and may delay shipment a few days.

BULB SIZES: Bulbs are graded into six different sizes from No. 1 to No. 6. The largest size is No. 1, which is 1½ inches in diameter or over. We offer JUMBO bulbs for sale which are over 2 inches. Jumbos are not usually offered separately. No. 2 bulbs run from 1¼ inches to 1½ inches, with ¼ inch variation in each size down to No. 6, which is ½ inch or under. These are all diameters. Do not be fooled by offers of bulbs sized by circumference. Gladiolus are usually sold by diameter. Retail lists are made up of Large, Medium and Small sizes. Large is No. 1 and No. 2 sizes; Medium No. 3 and No. 4 sizes; and Small No. 5 and No. 6 sizes. We always use the larger of the two sizes as long as they last. When they are gone we send the second size. If your order calls for medium and you get part No. 3 and part No. 4, please do not write us saying we sent the wrong size. It is simply that we were out of the larger size so we sent the next size which is still Medium.

Medium size bulbs will bloom although the spike will not usually have as many buds as the large size bulbs. Small size will bloom if they have a long season in which to grow.

We list in our retail list 5 bulbs at the 10 rate, but we do not send less than the smallest quoted unit. If a variety is listed 2 bulbs for 20 cents, we will not sell one bulb for 10 cents, as the clerical work, filling and packing orders will be too expensive.

GUARANTEE: Above all, we take great pains to keep our stock absolutely true to name, but mistakes do happen in spite of all we can do. Let us know about them and we will try to make a satisfactory adjustment. If you tell someone else we may never hear about it directly and cannot rectify our error. We have declared war on bulb diseases and feel confident we are winning the battle. Our program calls for thorough roguing, pre-planting and post-planting treatments of bulbs, dry kiln storage and hand work throughout. This adds to the labor cost materially, but we must do our utmost to give you the best we can.

But we do not warrant in any way, expressed or implied, the contents or the description, quality, productiveness, or any other matter of any seeds, bulbs or plants sold by us, and we will not in any way be responsible for the crop. If the purchaser does not accept these goods on these terms no sale is made and goods must be returned in ten days.

SUBSTITUTION: We do not substitute varieties unless you give express permission. We do occasionally substitute the next size larger or smaller, when we are out of the size ordered, and give you value in bulbs to the amount you send. It helps us if you will give permission to substitute and we will always try to substitute in color if so permitted. Very often you win because we send you something better than you ordered.

GLADIOLUS—Best Sellers - 1939-1949

Variety and Description		Per	Large	Medium	Small	Bulblets
ABU HASSAN (Holland-47)	378-77					
Dark violet-blue about the color of old Pelegrina. Large flowers, straight, strong stems.		2	\$0.35	3—\$0.25	4—\$0.25	25—\$0.25

CLEO (Youmans-48) 441-95						
New shade of soft pink with buff undertones and scarlet blotch. 59-inch plant with 27-inch flower head of 20 buds. 8 or more 5-inch florets, heavily ruffled, open at a time. Excellent texture and substance.		1	3.00	2.00	1.50	10— 3.00
				No Discount		
CONNECTICUT YANKEE (Schenetsky-44) 441-90						
One of the most beautiful Glads I have seen. Light pink with red throat blotch that blends well. Many open and perfect placement. A "must have."		1	1.00	.75	.50	2— .25
		10	8.00	6.00	4.00	100— 8.00
CORONA (Palmer-40) 560-80						
Well known pink with rose picotee edge. Distinctive and beautiful.		2	.25	4— .25
		10	1.00	.50	.30	100— .25
COTILLION (Butt-48) 442-85						
Deep pink with a creamy yellow throat. What makes this variety most valuable is that it will open very easily 10 perfectly placed florets at once, often more. Tall grower, 55 inches with 25-26 inch flower head, 18-20 buds. Slightly frilled florets about 5½ inches across.				\$1.50 any size 1 bulb and 10 bulblets for \$3.00 No Discount		
COVENTRY (Glass-47) 511-80						
New rich yellow with contrasting feather in throat of carmine. 6-8 open and nicely waved. 5½ inches in diameter; individual florets very beautiful. A fast propagator.		1	1.00	.60	.40	2— .25
		10	8.00	4.80	3.20	10— 1.00
				No Discount		
COVER GIRL (LaSalle-45) 442-90						
Medium pink, opens 10-12 blooms on a 30-inch spike. Very tall, heavy foliage. Wins many ribbons.		1	.25	.15	.10	10— .25
		10	2.00	1.20	.80	100— 2.00

GLADIOLUS—Best Sellers - 1939-1949

Variety and Description		Per	Large	Medium	Small	Bulblets
CRACKER JACK (Allen-46)	425-80					
Deep orange-yellow, throat with strawberry blotch. A wiry spike with 14-16 buds, 6 open, 5-6 showing color. 4½-inch florets, wide open, plain petaled, round. Has good texture, placement and attachment. Excellent propagator.		1	\$0.25	2—\$0.30	2—\$0.20	10—\$0.25
		10	2.00	100— 2.00
		No Discount

Very large light yellow; ruffled. Opens four on an average spike.		2	.35	2— .20	4— .25	25— .20
		10	1.40	.80	.50	100— .60
DAISY MAE (Lins-45)	420-90					
An outstanding commercial. An orange-pink with a rose-red throat blend. Vigorous, tall and stretchy.		1	.35	.20	2— .25	10— .35
		10	2.80	1.60	1.00	100— 2.00
DEBORAH SAMPSON (Scheer-47)	440-85					
Pastel blend of soft pink and creamy buff. Tall, strong grower, 7-10 large, well placed and well attached blooms. Excellent show flower and good commercial.		1	1.50	1.00	.65	1— .15
		10	12.00	8.00	6.20	10— 1.25
		No Discount				
DIEPPE (Hassell-45)	432-85					
Pfizer's Triumph type. Opens 8 salmon-scarlet florets nearly 5½ inches wide. Increases easily and has commercial possibilities.		1	.30	.15	2— .20	10— .25
		10	2.40	1.20	.80	100— 2.00
DONNA (Pruitt-40)	416-95					
Lovely ruffled golden buff. Belongs in every ruffled collection.		2	.30	3— .25	5— .25	25— .20
		10	1.20	.80	.50	100— .50
DR. WHITELEY (Riley-43)	516-85					
Large, yellowish apricot or buff. Outstanding in its class.		2	.30	2— .20	4— .25	25— .20
		10	1.20	.80	.50	100— .60
DUSTY MILLER (Elliott-45)	486-85					
A smoky old rose, mildly blotched red with cream penciling. 8 florets open on a 20-bud spike, always straight, vigorous grower.		1	.25	.15	2— .20	10— .25
						100— 2.00
		No Discount				
ELIZABETH THE QUEEN (White-41)	566-86					
In our opinion the best and most beautiful lavender. Not exceptionally tall but fancy even when short. Grows 48 inches tall consistently for us. Opens 7-8 beautifully ruffled, somewhat needle-pointed florets on an 18-bud spike.		2	.25	3— .25	6— .25	25— .20
		10	1.00	.65	.40	100— .50
ETHEL CAVE-COLE (Cave-41)	440-80					
Light pink that sometimes flakes. Massive spikes with 8 open and most all other buds showing color. Good commercial.		3	.25	3— .20
		10	.75	.50	.30	100— .35
EVANGELINE (Palmer-48)	560-92					
Light rose-pink with large ruffled, 5½-inch florets and soft cream throat. 25-30 inch flower head; 18-20 buds and 8-12 florets open. Consistent winner of the highest awards.		\$5.00 any size bulb 1 bulb and 10 bulblets for \$10.00 No Discount				
FABULOUS (LaSalle-46)	443-85					
If you like blotch varieties, this one will look right for you. Pink with deeper pink throat on cream foreground.		1	1.00	.75	.50	2— .25
		10	8.00	6.00	4.00	100— 8.00
		No Discount				
FLORENCE NIGHTINGALE (Harris-47)	400-88					
Finest Canadian white, 66 inches tall, 8 open and 22 buds; straight, ruffled florets with excellent substance and perfect placement. Good propagator.		1	1.00	.75	.50	2— .25
		10	8.00	6.00	4.00	10— 1.00
		No Discount

				No Discount			
LADY JANE (Lake-41)	406-85						
Clear light cream with yellow lip. Appears to be a light yellow. Fine commercial and show flower.		2	.20	4— .25	8— .25	25— .20	
		10	.80	.50	.30	100— .40	
LADY LUCK (Harris-44)	540-80						
Sport of Picardy, very nice peaches-and-cream color. Similar to Greta Garbo, but longer head. Different than other Picardy sports. A real beauty worth trying.		1	.25	2— .35	3— .25	15— .25	
		10	2.00	1.40	.80	100— 1.00	
LANCASTER (Palmer-44)	470-85						
Clear dark purple with 8-10 lightly waved and ruffled blooms open on a tall, straight stem. An improvement in the purple class.		1	.35	.25	.20	10— .30	
		10	2.80	2.00	1.60	100— 2.00	
LANTANA (Palmer-43)	420-75						
Early orange and yellow. Opens 6-8 rather large florets on a medium stem. About the best in this color combination.		2	.20	4— .25	25— .20	
		10	.80	.50	.30	100— .40	
LAVENDER AND GOLD (Baerman-43)	366-70						
Early, 5-7 open, frilled, yellow-throated lavender. Blooms on a tall, wiry, straight stem. Good grower and propagator. Excellent commercial value.		2	.25	4— .25	25— .25	
		10	1.00	.50	.35	100— .70	
LAVENDER PRINCE (LaSalle-44)	466-90						
Tall and better than King Arthur and a little lighter shade of lavender. Looks good and should make a good commercial.		1	.25	.15	.10	10— .25	
		10	2.00	1.20	.80	100— 2.00	
LAVENDER QUEEN (Arenius-37)	366-82						
Deep lavender-mauve that flakes in real hot weather. Very strong grower and a good show flower. We like it.		2	.20	4— .25	25— .20	
		10	.80	.50	.35	100— .40	
LEADING LADY (Johnston-42)	506-87						
Most popular Picardy sport. Grown commercially for cut flowers in all parts of the country. Leading white. Creamy white with no markings. Clean and excellent grower.		2	.30	2— .20	5— .25	35— .25	
		10	1.20	.80	.50	100— .50	
LIPSTICK (Balentine-41)	441-90						
Beautiful ruffled shell-pink with bright rose-red plumes in throat. Florets large, good texture and all the buds show color on tall, straight spikes.		1	.25	2— .30	3— .25	20— .30	
		10	2.00	1.20	.75	100— 1.25	
LUCKY (Jack-47)	466-85						
Clear lavender with small cream throat. 20 buds, 6-7 open, 5-inch blooms, flower head 25 inches. Good placement, healthy grower, good propagator.		1	.75	.50	.25	4— .25	
		10	6.00	4.00	2.00	10— .50	
				No Discount			

GLADIOLUS— Best Sellers - 1939-1949

Variety and Description		Per	Large	Medium	Small	Bulblets

		10	1.00	.50	.30	100— .70	
MARION PEARL (Benedict-42)	442-85						
One of the most beautiful pinks, blending to a lighter throat, I have ever seen. Fine placement and a real show Glad. Slow propagator.		1	.50	.35	.25	10— .50	
		10	4.00	2.80	2.00	100— 4.00	
MAYLING (Hatch-43)	440-85						
Ruffled flesh-pink with a lavender tint. Opens 8 medium size blooms, beautifully ruffled. Fine grower and show flower.		2	.25	4— .25	6— .25	25— .20	
		10	1.00	.50	.35	100— .50	
MISS WISCONSIN (Krueger-43)	460-90						
Shade of rose not common in Glads, but badly needed. 6-8 open on an 18-bud spike. Tall, healthy grower and average increaser.		1	.35	.25	2— .30	10— .35	
		10	2.80	2.00	1.20	100— 1.50	
MISTY DAWN (Rich-41)	580-95						
Soft smoky gray or bluish salmon with a smoky orange-red blotch. 6-7 inch blooms on a tall plant. Fine show flower.		2	.25	4— .25	6— .25	25— .25	
		10	1.00	.50	.35	100— .60	
MOHAWK (Stevens-40)	454-85						
Deep glistening maroon that opens up to 10 blooms at a time. Outstanding.		2	.30	2— .20	4— .25	25— .25	
		10	1.20	.80	.50	100— .60	
MOTHER KADEL (Kadel-41)	410-77						
Our best commercial yellow; steady winner of blue ribbons. Medium yellow without any foreign color. Like wax to the very depth of the throat. Good shipper.		2	.25	3— .25	25— .25	
		10	1.00	.60	.40	100— .50	
MRS. MARKS MEMORY (K. & M.-41)	570-88						
Large florets of reddish violet or rose-purple with a small carmine blotch. Tall and real nice.		2	.25	3— .25	6— .25	25— .25	
		10	1.00	.60	.40	
MT. INDEX (Miller-42)	501-63						
A giant white with a yellow throat mark. An excellent color. Very tall and increases well.		2	.30	2— .20	4— .25	15— .20	
		10	1.20	.80	.50	100— .70	

GLADIOLUS — Best Sellers - 1939-1949

Variety and Description		Per	Large	Medium	Small	Bulblets

GLADIOLUS — Best Sellers - 1939-1949

Variety and Description	Per	Large	Medium	Small	Bulblets
SILVER WINGS (Ritsema-44) 500-88 Picardy sport that is whiter than its sister "Leading Lady," but our Snow Flurry is still whiter and much better attachment.	1 10	\$0.25 2.00	\$0.15 1.20	\$0.10 .80	4—\$0.25 10— .40
SNOW FLURRY (Clark-47) 400-85 Clean, pure white Picardy sport, nicely ruffled, 18-20 buds. Blooms flat against the stem. Excellent attachment. Opens 6-8 well placed florets. Should make excellent commercial.	1 10	.75 6.00	.50 4.00	.35 2.80	3— .25 10— .75 100— 6.00
SNOW PRINCESS (Pfitzer-39) 400-80 Creamy white that will surpass Maid of Orleans as a commercial. Opens better when cut in tight bud.	3 10	.25 .75	5— .25 .50	.30	100— .25
SPARKS (Glass-47) 507-95 Sister seedling to Coventry, but a little lighter in color and later to bloom. Cream with orange-scarlet feather on three lower petals. Opens 7 large, fluted, triangular florets of glistening color. 16-18 buds 5½ inches in diameter. Fair multiplier.	1 10	1.00 8.00	.60 4.80	.40 3.20	2— .25 10— 1.00
SPIC AND SPAN (Carlson-46) 432-80 Ruffled deep pink which wins on number open and flower head. 20-22 buds, 10 open, nice placement. Excellent commercial spikes from small buds. Heavy germinator and good propagator. Makes nice baskets.	1	1.75	1.25 No Discount	.75	3— .50 10— 1.50
SPITFIRE (Evans-42) 432-80 Clear rosy toned salmon with white throat. Opens 8-10 slightly ruffled 5-inch florets. Tall, strong stem, no crooking. Especially disease resistant. Propagation medium.	1 10	.50 4.00	.35 2.80 No Discount	.25 2.00
SPOTLIGHT (Palmer-44) 413-88 Very large, wide open, round flower in deep yellow with small scarlet blotch. Free bloomer and good propagator.	1 10	.20 1.60	2— .25 1.00	4— .25 .60	10— .15 100— 1.25
STOPLIGHT (Lins-42) 452-90 Don't confuse this red with the yellow listed above. Names are similar but varieties different. Equally valuable in their class. This is clear ruffled red, opening 6-8 blooms on a tall, wiry stem. Heavy producer and recognized commercial.	2 10	.25 1.00	4— .25 .60	.40	25— .20 100— .50
SUMMER GAL (Zimmer-44) 542-80 Sensational show flower. Beautiful ruffled geranium-pink. 8 open, 6-inch blooms on a 5-foot plant. Real good grower and the best in the deep pink class.	1 10	1.50 12.00	1.00 8.00	.50 4.00	1— .20 10— 1.50

GLADIOLUS — Best Sellers - 1939-1949

WHITE GOLD (Scheer-41) Much advertised huge cream. Good grower.	2 10	.25 1.00	4— .30 .75	5— .25 .40	100— .40

Explanation

After each variety name in parenthesis () is the originator's name and date of introduction. The other numbers (216-80), the first series is the classification number and the second the average number of days to bloom.

If interested in the following varieties write us for prices. If we continued to grow and propagate every variety we buy in, in five years it would take a catalog many times the size of this to list them all. It is necessary to eliminate some varieties each year in order to keep up with the new ones being introduced. Some of these we can supply in 100 lots and others by the thousands. They are all good varieties but we must make room for others. We will be glad to receive inquiries for prices on these.

Dutch or Fall Bulb Folder

Everyone now on our mailing list will receive our folder on bulbs for fall planting. It will list only selected varieties of the best quality obtainable, including Tulips, Daffodils, Hyacinths, Crocus, Lilies and many other items for fall planting. Wait for our list before you buy. YOU CAN'T GO WRONG IF YOU BUY FROM MOSES.

Popular Small Flowered Gladiolus

A New Fashion in the Ever Popular Mases'

Used by the ladies for centerpieces, corsages, and vases where lighter and more dainty material is appropriate. Garden Club members find these little fellows very useful. For decorative purposes they are really more useful than the larger Glads.

Gladiolus Care and Culture

(Revised to September, 1948)

When bulbs are received they should be opened at once and stored in a cool, dry place. About a week later check them over for frost damage. Best storage temperature is about 40 degrees.

PLANTING TIME: This is in general when the soil is warmed up in the spring. In Central New York it may be any time from April 1st to July 1st, depending upon the time bloom is wanted in the summer and the variety planted. Comparative blooming dates are listed after varieties in the retail list. The average planting date here is from May 15th to May 30th. A good rule to follow is to make your earliest planting when the Maple trees begin to leaf out.

THE BEST PLACE TO PLANT: Is where they will have full sun, as they do their best if they have no competition from trees or shrubs nearby. A soil that will grow good potatoes will be most satisfactory but Glads are very tolerant in their soil requirements. Good drainage is essential to best performance. Glads like lots of water at blooming time but can't stand wet feet. They grow best in neutral soil but will also do well where it is slightly sweet or slightly acid.

DISINFECTING: Bulbs should be clean when planted. If there are thrip on them they should be killed. 5% DDT Dust with talc is a perfectly safe treatment at any stage and the dust does no harm if planted on the bulbs. It will kill thrip if used on the bulbs in storage. Best method is to sprinkle dust on them when they are taken in from the field in the fall and then give them another shot after they have been cleaned. But to be absolutely sure, dust any bulbs you get during the winter regardless of the source. Most diseases of Gladiolus are of a fungous nature. These are spread through spores, tiny organisms which are checked by fungicides. The usual method of treatment is a pre-planting dip. We use New Improved Ceresan, but Lysol, Cresol Compound or Corrosive Sublimate are used by many growers. These dips are used to control disease and are not necessarily a thrip control. The only thrip you kill with the dip are those you drown. The eggs still remain to hatch and cause you trouble.

NEW IMPROVED CERESAN FORMULA: One ounce of New Improved Ceresan, 3 tablespoons of Grasselli Spreader-Sticker (or $\frac{1}{2}$ box of DREFT), 3 gallons of water. For larger quantities: $\frac{1}{2}$ lb. New Improved Ceresan, 5 tablespoons (or 1 box of Dreft), 25 gallons of water. Soak bulbs 15 minutes, Bulblets 30 minutes. **DO NOT EXCEED THIS TIME!** Let drain and plant same day, while wet if possible. If you cannot plant within a very few hours, rinse thoroughly and do not soak again. Severe losses can happen unless you follow the above directions very carefully. To mix above formulas easily, add the spreader to the Ceresan with a small amount of water and stir until a smooth paste is formed; then add the rest of the water. When stirring this do not use the hands, as the concentrated mixture can cause serious burns. Use a wooden paddle. Bulbs treated in the weak solution can be handled safely. **DO NOT FORGET** you may lose your bulbs if you leave them in the solution longer than 15 minutes or 30 minutes for bulblets.

LYSOL: For most amateurs this is probably the easiest and safest dip to use. One teaspoon of Lysol to 1 quart of water; 4 tablespoons to 4 gallons of water; 1 pint of Lysol to 25 gallons of water. Soak bulbs in solution from 3 to 6 hours, bulblets 12 to 14 hours. Plant the same day as treated, while wet if possible. Solution good for five lots.

CRESOL COMPOUND may be substituted for Lysol in the above formula, same quantity. Your local druggist can supply LYSOL, we can supply CRESOL COMPOUND.

— o O o —

SOIL PREPARATION: A good coat of well rotted stable manure plowed or spaded under the fall before planting is a very good start. The soil should be plowed or spaded deeply to give the roots opportunity to secure food and moisture at a lower level. If manure cannot be obtained, peat moss can be used for humus with a good commercial fertilizer such as 4-8-8 or 4-12-8 for bloom production and 4-8-12 for production of bulbs. Any garden compost will serve as good humus or a cover crop of rye, clover, soybeans or rye grass, plowed under the year before is excellent.

For bloom production, on medium to heavy soil, one half the fertilizer should be broadcast on top before plowing or spading, and the balance before fitting the ground. This should give excellent results. For exhibition bloom some like to put part of the fertilizer in the bottom of the trench mixed with the soil and an inch or so of peat moss on top for humus. Most of our soils are deficient in humus and peat moss is an excellent aid in building up this lack, retaining moisture in light, sandy soils and loosening up the heavier clay types. Most of our special planting plots would be much improved by this method. It is especially valuable in growing bulblets or Gladiolus seed.

Gladiolus Care and Culture

(Revised to September, 1947)

PLANTING BULBS: Bulbs may be planted 3 to 6 inches apart in the row (not less than twice the diameter of the bulb) with rows 20 inches to 3 feet apart. For show blooms, 6 inches apart is best with rows at least 30 inches apart. Depth, for large bulbs, 4 to 5 inches in heavy soil, 6 inches in lighter soil, small bulbs 3 inches and bulblets $1\frac{1}{2}$ to 2 inches deep. Be sure to give plenty of water before and during the blooming season.

BULBLET GROWING: Small lots of valuable bulblets may be peeled or cracked with a quicker and surer start to be expected. Larger lots that might need help in starting can be aided by being soaked at night and put in the sun in a cloth bag during the day for a week or so. If you have peeled the bulblets we would advise treating as if they were bulbs in Lysol or Ceresan.

CARE: After planting, cultivating once a week and weeding will help growth. Cultivation may be deeper at first but later should be shallow to avoid cutting off feeder roots. The plants should be hilled up before the roots get too long (when about a foot high). This will aid in holding blooming spikes erect in windy weather. When spikes are up to a foot or more, heavy watering should be given if there is no rain.

FOR EXHIBITION BLOOMS: To give these an extra boost, fertilizer may be side dressed when the plants are nearly in the bud stage. Scatter about a handful each three feet along the side of the row about three inches from the plants just before a rain or watering and cultivate in well.

SPRAY: From the time the plants are six inches tall they should be sprayed or dusted for thrip. Thrip may have been planted on your bulbs, having lived over in storage, or been brought in on bulbs you bought or get from your neighbor. They may blow in from some distance or fly in as at one stage of their existence they can fly as far as one-half mile. Therefore, even if your planting is supposed to be clean, you should spray or dust for thrip control. A spray that has been widely and effectively used is made up of 1 ounce of Tartar Emetic ($4\frac{1}{2}$ teaspoons), 2 ounces of brown sugar, 3 gallons of water. (3 tablespoons of molasses or corn syrup may be used instead of sugar.)

DDT: We find DDT very effective as a thrip control. Either dust or spray is effective. We use DDT Dust with talc of 5% strength at the rate of 30 lbs. to the acre each time over. We use a power machine, but a hand duster that will make a dust fog around the plants is just as good. BUT REMEMBER, to kill the thrip the dust must touch the insect and as they are normally in the sheath, one dusting will not clean them out. Three to five applications at 7- to 10-day intervals are necessary. We have 5% DDT Dust with talc and can supply you at any time. It is as near as your post office.

Many prefer a liquid spray and we have 50% Wettable Powder (Deenate). This should be diluted with water to about 5% strength. $1\frac{1}{2}$ lbs. to 100 gallons of water is about right or 4 level teaspoons to 3 gallons of water.

The best part of using DDT dust or spray is that there is no danger to the plant by using too strong a solution. The active ingredient is harmful only to insects. A toxic condition may be produced by inhaling too much of the dust or spray, but it has no permanent effect and ordinary care is sufficient to insure no harm to the person making the application.

WIREWORMS: Wireworms can now be controlled by the use of Lexone cultivated into the soil at the rate of 12 lbs. to the acre before planting. Vegetable crops will have a bad flavor if planted on this ground in two years after application, but no harm is found in bulbs. We can supply you. Write for prices.

WHEN CUTTING flower spikes, a small knife blade slid down the stem on each side between the stalk and the leaves and cutting across the bottom will permit you to leave four to six leaves on the plant to mature the bulb. Spikes are best cut in the morning when one or two blossoms are open.

DIGGING: Bulbs can be dug 30 days after the flower is gone, or before freezing weather sets in. The tops should be cut off after the bulbs are lifted as close as possible to the bulb. Pruning shears do this very nicely. If stalks turn brown prematurely the bulb is probably diseased and should be destroyed with all the foliage.

STORING: Bulbs may be stored in flat boxes to dry and cure. They should be not more than 4 inches deep so they will dry well. If wooden boxes with wire bottoms are used, curing will be hastened if bulbs are washed with a fine spray. Care must be used to not tear the husks with the force. Bulbs will be much easier to clean and there will be little dirt in the bulblets. As soon as the bulbs are dry and in the storage (about three weeks after digging) they should be treated with either Naphthalene Flakes or 5% DDT Dust with talc. DDT Dust may be left on all winter but Naphthalene Flakes must not stay on over three weeks. If Naphthalene is used the trays should be covered so the fumes will be contained. This treatment will ruin the bulbs if it is used late in the winter after the root knobs form. DDT Dust is safer and surer.

Gladiolus Care and Culture

Bulbs should be cleaned either before or after this treatment. Cleaning means removing the old roots and old bulb and sorting out and discarding all diseased bulbs. Bulblets may be separated at this time.

We offer the following chemicals for insect and disease control in Gladiolus plantings. These prices are subject to change without notice. If your order is F.O.B. please designate the way you want it shipped.

CRESOL COMPOUND

1-pt. bottle (postpaid)	\$0.90

Champion Knapsack Sprayer

For Effective Dusting and Spraying

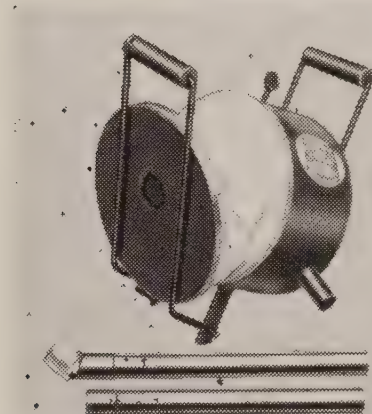

CHAMPION KNAPSACK SPRAYER

This all-brass, portable sprayer combines in one unit all the desirable qualities of dependable power, simple operation, effective control, continuous agitation of solution, long life. Uniform pressure of 200 lbs. in sturdy pressure cylinder is pumped as needed. With the Champion you can spray any liquid, including acids, water paint, etc. Weighs 14 lbs. empty; holds 4½ gals. Shipping weight 16 lbs.

Price, \$27.95

Champion Dusting Machine

Champion Hand Duster

CHAMPION HAND DUSTER

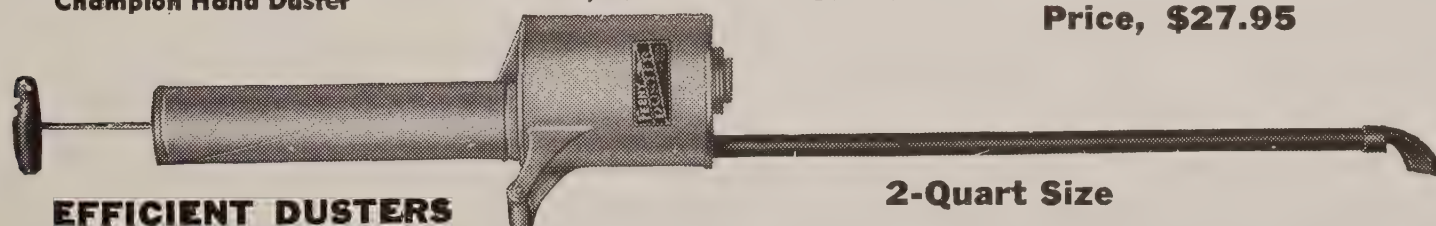

Simplicity of design makes this Champion Duster ideal for flowers, vegetables, shrubs and small trees. All parts enclosed; lead-coated steel tank; genuine leather bellows; no moisture can get in to clog powder. Weighs 5 lbs. empty. Shipping weight 6 lbs.

Price, \$9.85

CHAMPION DUSTING MACHINE

Here is the big value, long-life, portable machine, especially designed for effective spot dusting. Operating lever grinds and mixes powder and throws dust where it's wanted without waste. Operator can reach under-side of low plants without bending over, or shoot blast of powder 30 feet high. Used like a knapsack; no gears to get out of order; long-life bellows. Weighs 15 lbs. empty; holds up to 25 lbs. of dust. Shipping weight 20 lbs.

Price, \$27.95

EFFICIENT DUSTERS

2-Quart Size

Ideal for vegetable and flower gardens, shrubs, and small fruits. Special flared nozzle comes with the two-quart size for Mexican bean beetle control where the under side of foliage must be dusted.

2-qt. size, \$3.45 postpaid

1-qt. size, \$1.45, postpaid

Hardy Garden Lilies

Splendid Varieties That Will Give a Wealth of Bloom

Lilies can create more interest in your hardy borders or rock gardens than any other group of plants mainly because of the wide range of varieties. The characteristics of the plant, the shape of the flowers, and the preference as to soil together with a long blooming range from June to late fall make Lilies especially interesting. Though we give a few cultural hints under individual varieties, it can be generally said that Lilies prefer a cool, moist soil, produced by a mulch of leaves, peat moss, or a thick, low growing ground cover. Unless otherwise noted plant from 4 to 6 inches deep and about 10 to 12 inches apart. Lilies can be used almost anywhere in your garden. Plant in groups among perennials, low border shrubs or bank against low evergreens. Some especially good combinations are Candidum with Delphiniums, Henryi with Evergreens or Buddleia, and Regals with climbing Roses.

We are taking special care to produce and sell only mosaic-free bulbs. This is one of the principal reasons for failure with Lilies. Careful roguing and propagating from seed where possible is your assurance of healthy bulbs. All bulbs we ship are top size for the variety.

LILIUM AURATUM ESPERANZA (Gold Band Lily)

These are American Hybrids and are not to be confused with Japanese-grown Auratum. The Esperanza strain gives many combinations of white flowers spotted crimson and banded with gold. No two plants will flower alike. Season late July to September. Plants 4 to 6 feet high. Partial shade. Fragrant.

Each \$1.95

3 for \$5.60

12 for \$20.00

LILIUM CANDIDUM (Madonna Lily)

Many large, fragrant, white, funnel-shaped flowers on plants 3 to 5 feet high. Prefer full sun and especially striking when used with Delphiniums. Bulbs should be planted only 2 inches deep. Shipped in late August only.

Each \$0.50

3 for \$1.35

12 for \$5.25

LILIUM HENRYI (Orange Speciosum Lily)

Bright orange-yellow spotted brown. Flowers of medium size recurved type on stems 5 to 8 feet. Prefers partial shade, blooms plentifully in August. Our easiest grower.

Each \$0.70

3 for \$1.75

12 for \$7.00

LILIUM MAXWILL (Maxwill Lily)

Medium size, bright orange-red, spotted black, of recurved type, on stems 4 to 6 feet. Blooms profusely in July with up to 40 blooms per plant. Adaptable to almost any soil condition.

Each \$0.55

3 for \$1.45

12 for \$5.50

LILIUM REGALIANUM (Regal Lily)

Large, white, fragrant blooms with a purple-rose flush. Trumpet type. Blooms in June and July. Grows 3 to 6 feet. Plant 6 to 8 inches deep.

Each \$0.45

3 for \$1.25

12 for \$4.50

LILIUM SPECIOSUM RUBRUM (Pink Showy Lily)

Large recurved blooms varying from rose-pink to carmine-pink, spotted crimson. Fragrant. Plants 3 to 5 feet tall and likes partial shade.

Each \$0.90

3 for \$2.50

12 for \$9.75

LILIUM TIGRINUM FLORE-PLENO (Double Tiger Lily)

This old-fashioned standby has large, dark salmon-orange blooms spotted with mahogany. Blooms in August and grows 5 feet tall.

Each \$0.40

3 for \$1.00

12 for \$3.50

LILIUM WILLMOTTIAE (Swehwan Lily)

Medium size, orange-red blooms, dotted with black, on plants 3 to 6 feet tall. Blooms in July. One of the unusual varieties sure to cause comment among garden visitors.

Each \$0.45

3 for \$1.25

12 for \$4.50

Moses Select Small Fruits for the

BLACKBERRIES

Prices:

1-year, No. 1, select plants:
25 for \$3.30; 100 for \$9.75;
500 for \$34.50. (In spring.)

ALFRED. Early July. Very good for home use as the plant is a hardy grower and heavy bearer.

ELDORADO. August. Largest of the hardy Blackberries. Berries in clusters, and sweet.

Thornless BOYSENBERRY

A Superior Raspberry Flavor

This berry has received much acclaim because of its 1½-inch berry. Can be used the same as any Blackberry: fresh, canned, pies, or jellies. Bears in late July. **Prices:** **2-yr., No. 1, selected plants, 6 for \$2.00; 10 for \$2.55; 25 for \$4.50.** (In spring.)

The Great Alfred Blackberry

Mary Washington Asparagus

ASPARAGUS - A Table Delicacy

MARY WASHINGTON. More rust resistant and a stronger grower than any variety of Asparagus. Every home garden should contain at least a small bed. Culture is simple and one planting lasts many years. **Prices:** **2-yr., No. 1 plants, 25 for \$2.00; 100 for \$5.40; 1000 for \$26.00.** (Shipped in spring only.)

RHUBARB - Excellent for Pies

MacDONALD. Grown from divisions, it will outyield any other variety. It is only mildly acid and takes less sugar than the others. **Prices:** **No. 1 divisions, 65c each; 3 for \$1.75.** (In spring.)

CURRENTS - The New Red Lake

A choice Currant with light red berries in long clusters. Ripens in early July but holds on over a long period. **Prices:** **75c each; 3 for \$1.85; 10 for \$5.50.** (Shipped in spring only.)

COLLECTION No. 2 The Grape Arbor

1 Concord. Black. **1 Catawba.** Maroon.
1 Niagara. White. **1 Golden Muscat.**
1 Delaware. Red.
All 5—2-year, No. 1 vines for \$2.10
Shipped postpaid at planting time (in spring).

INDIAN SUMMER Raspberries. (Ever-bearing.) This red Raspberry will ripen a good crop in early July with other red Raspberries and early in September will bear another crop continuing until frost. Berries large, round and dark red. **25 for \$5.00; 100 for \$13.00; 500 for \$45.00.**

Home Garden and Limited Spaces

BLUEBERRIES

By careful breeding these are far superior to the wild Blueberries. Two to six bushes will supply the average family with berries for pies and canning. They last a lifetime, increasing in yield each year. Two different varieties should be planted to pollinate the plants. It likes an acid soil so add peat moss or partially rotted vegetable matter around the plants. We find sawdust mulch to be very successful. They can be used as an ornamental shrub in a border. (Shipped in spring only.)

Prices, 3-Year Plants:

12-18 in., \$1.45 each; 10 for \$10.00

18-24 in., \$2.20 each; 10 for \$15.00

CABOT. Earliest. Low growing type.

CONCORD. Midseason. High bush. Largest berries.

RANCOCAS. Midseason. Upright grower; very heavy producer.

RUBEL. Latest and heaviest bearing of all. Best for canning.

GRAPES

Prices (except as noted):

2-year, No. 1, strong, well rooted vines, 55c each; 3 for \$1.50; 10 for \$4.00; 50 for \$14.00. (In spring.)

CACO. Red. Very late and a good keeper.

CONCORD. Most popular of the black Grapes. Berries large, sweet and juicy.

FREDONIA. A good early black Grape.

NIAGARA. A popular and delicious white Grape.

PORTLAND. Very early, large white Grape.

GOLDEN MUSCAT. A golden colored California type Grape. Hardy in this latitude and a vigorous grower. Produces plenty of solid, meaty fruit. \$1.00 each; 3 for \$2.70. (Spring.)

Raspberries *That Excel*

(Shipped in Spring Only)

Prices (except Indian Summer): 1-yr., No. 1, select plants, 25 for \$4.10; 100 for \$12.15; 1000 for \$75.00. Heavy transplants in most varieties can be bought for 5c per plant additional.

BRISTOL. Very good black Raspberry. Large, firm berries in early July. A hardy, vigorous grower in New York State.

MORRISON. Black Raspberry. Large, juicy black berry having almost no seeds. Excellent jam maker.

SODUS. Purple. Berries are large and good flavor. Plants are especially adapted to poorer soil conditions.

LATHAM. Red Raspberry. Once you have grown this berry you will want more as it is excellent as a jam maker.

TAYLOR. Red. Long, firm berry and one of the heaviest bearers. Season is early July.

✓ **INDIAN SUMMER.** A really outstanding new everbearing variety of merit. See page 38 for full description.

Strawberries -

You Can Always Depend on Our Golden Rooted Plants—They Grow

STANDARD VARIETIES

Prices: 25 for \$1.25; 100 for \$3.10; 1000 for \$16.00. (Shipped in spring only.)

CATSKILL. Midseason. Excellent keeper. Will produce a heavy crop annually. Berries large and bright red.

CHESAPEAKE. Late. Best of the market berries. Does best in moist, fertile soil.

DORSETT. Early. Probably the best of the early heavy cropping varieties.

PREMIER. Early. Berries very large and exceptionally red. For jam making it has no equal.

RED STAR. Extremely late. Large, firm, red berries. Plants are vigorous growers and very productive. This will extend your Strawberry season as no other type will.

SPARKLE. A week later than Premier. It is fairly large, bright red, smooth and firm. Vigorous plants and disease resistant. Produces an excellent crop. Geneva Experiment Station (N. Y.) claims it is the best late variety tested. Good freezer.

TWO EVERBEARING VARIETIES

EVERMORE. A new everbearer. Fruit is rather dark red, of very good flavor and has excellent keeping quality. **Prices: 25 for \$1.80; 100 for \$4.75; 1000 for \$22.00.** (Shipped in spring only.)

STREAMLINER. A recent introduction soon to become a leader. It has improved firmness over other everbearers and yet is equal in size, flavor and color. **Prices: 25 for \$2.25; 100 for \$7.00; 1000 for \$35.00.** (Shipped in spring only.)

COLLECTION No. 1 The Strawberry Bed

This collection gives you fine berries for the maximum length of time.
